Welcome to Vitreus
WHERE WEB3 HAS BEEN ENERGIZED!

Our fresh Layer 0 environment welcomes you through an iOS and Android compatible application that will be your source of interaction with VTRS, VNRG and vNodes! This instruction set has been crafted to specifically guide you through how to claim your VTRS from your NFT Vouchers that were acquired during the presale rounds this last year.

For further instructions: Mainnet Instructions – Claim, Stake & Validate
If you have any questions: https://discord.gg/vitreus

1. Proceed to: https://claiming.vtrs.io/
2. Connect your ETH wallet
    a.   If you're using a mobile device
        i.   Open your preferred wallet app before proceeding to receive the contract call
        ii.   Either click the green button or the 1st wallet address display at the top right of the screen
        iii.   Using the 4 connection options, connect your ETH wallet

            * If you don't see your wallet app as a direct connection option, use WalletConnect
            * If you're on a computer, scan the QR code with your wallet app
            * If you're on mobile, sign the transaction in your wallet
               Note, if you sign the transaction there is a possibility that you may need to manually return to the claim page.
        iv.   Your wallet is connected.
        v.   Your NFT(s) will be detected automatically.

3. Connect your VTRS wallet
    a.   Have your vApp open
    b.   Either click the green button or the 2nd wallet address display at the top right of the screen
    c.   If you're on PC, a QR code will appear. Scan it with vApp
    d.   If you're on mobile, vApp will be opened
    e.   Sign the transaction

4. Confirm your Claim
    a.   With both wallet addresses attached, the appropriate network active for your ETH address and an NFT detected in your ETH wallet, claiming your VTRS is one button push away!
    b.   You will need to sign a transaction in your ETH wallet
    c.   You will need to sign a transaction in your VTRS wallet
    d.   When both signatures are done, you have claimed!

        Note: There are a total of 4 signatures required to perform the claim. 2 for connecting your wallets and 2 for confirming your claim.
